

The World Bank Global Economic Monitor provides commentary on global economic conditions. It provides analysis of current economic trends, economic, financial and commodity data indicators, an extensive database including growth and commodity forecasts. <http://data.worldbank.org/about/country-classifications>

Under the GEM, the following countries qualify for Developing Country status as low or low-middle income classification. <http://databank.worldbank.org/ddp/home.do?Step=12&id=4&CNO=1158>
