# Nosocomial Infections

## Challenges in Vaccine Development

For more information visit [www.nyas.org/Nosocomial](http://www.nyas.org/Nosocomial)

This meeting will focus on current knowledge about vaccines for nosocomial infections, and specifically on the pathogenesis of select nosocomial bacteria. Talks will focus on host immunology, as well as lessons learned from vaccines currently in use and those under development.

### Chair

Michael Watson, Sanofi Pasteur

### Speakers

#### **The Epidemiology of Healthcare-Associated Infections: Challenges and Opportunities for Prevention**

Cliff MacDonald, MD, Centers for Disease Control and Prevention

#### **Why is it Happening? Pathogens: *Staphylococcus***

Richard Novick, MD, New York University

#### **Why is it Happening? Host: Biofilms**

Jun F. (James) Liang, Stevens Institute of Technology

#### **Lessons from Vaccines that have been Successfully Developed:**

##### ***Pneumococcal Polysaccharide CRM197 Conjugate Vaccines***

William C. Gruber, MD, SVP, Pfizer Vaccine Clinical Research & Development

#### **Challenges for Vaccines under Development: *Clostridium difficile***

Paul Giannasca, PhD, Sanofi Pasteur

Sponsored by the **Vaccine Science Discussion Group** at the **New York Academy of Sciences**.

### Registration

Member: FREE

Non-Member: \$20

Non-Member Student: \$10

### Reception to Follow

### Location

The New York  
Academy of Sciences  
7 World Trade Center  
250 Greenwich St, 40th Fl  
New York, NY 10007
