

	Medical Masks	Gloves	Gowns	Eye protection	Respirators
CDC					
Isolation precautions: Standard and contact precautions plus eye protection should be used for all patient care activities for patients being evaluated or in isolation for novel H1N1		X	X	X	X (N95)
Respiratory protection: All healthcare personnel who enter the rooms of patients in isolation with confirmed, suspected, or probable novel H1N1 influenza should wear a fit-tested disposable N95 respirator or better					X
Aerosol-generating procedures					X

CDC Guideline Institutions

Yale New Haven Hospital

Cleveland Clinic Foundation

WHO	Medical Masks	Gloves	Gowns	Eye protection	Respirators
Per droplet precautions, when in direct contact with patients	X				
When collecting blood	X	X			
Per standard precautions, for procedures with a risk for splashes onto the face and body	X	X	X	X	
When completing a nasal swab and nasal wash	X	X	X	X	
When performing aerosol-generating procedures		X	X	X	X

HICPAC	Medical Masks	Gloves	Gowns	Eye protection	Respirators
As per standard/droplet precautions for suspected/confirmed cases of H1N1 (droplet precautions for 7 days after onset of illness)	X	X	X	X	
Aerosol-generating procedures (bronchoscopy, intubation, CPR, open airway suctioning, airway induction)	X	X	X	X	X

SHEA	Medical Masks	Gloves	Gowns	Eye protection	Respirators
Placing surgical masks on suspected or confirmed cases of H1N1 at point of contact with healthcare facility	X				
As per standard/droplet precautions for suspected/confirmed cases of H1N1	X	X	X	X	
Performing aerosol-generating procedures (as per HICPAC: bronchoscopy, <u>open</u> suctioning of airway secretions, resuscitation involving emergency intubation or CPR, and endotracheal intubation)	X	X	X	X	X
