Wayne State University School of Medicine Presents:

Antimicrobial Resistance: Management, Prevention and Therapeutic Strategies

Wayne State University School of Medicine presents a one day conference to be held in the Auditorium of Wayne State University's Eugene Applebaum College of Pharmacy and Health Sciences.

There is an urgency to reduce the emergence and control the spread of antimicrobial resistance. This can be achieved through antimicrobial stewardship, infection prevention and collaborations with public health. This regional program will provide current data and strategies that can be implemented by healthcare and public health officials.

This program is designed for Physicians, Infectious Disease Specialists, Infection Preventionists, Pharmacists, Nurses, Nurse Practitioners and Allied Health Professionals.

Conference content and structure developed by George Alangaden, M.D. and Keith Kaye, M.D., M.P.H.

PROGRAM OBJECTIVES

- Review epidemiology of multi-drug resistant pathogens.
- Describe available treatment modalities for infections caused by multi-drug resistant pathogens.
- Understand methods and processes to prevent the emergence and spread of multi-drug resistant pathogens.
- Improve the management of patients who are colonized or infected with multi-drug resistant pathogens.

AGENDA

7:30 AM-8:00 AM: Registration and Welcome
